## BAR CONTROLS

*Do you think your bar could produce more profits from your existing sales...?*

### WI-POUR DISPENSING SPOUT

Four programmable portion sizes ensure perfect pour every use.

Variety of cork sizes allows use on the majority of products carried in your bar.

Wireless reporting of all pour events to receiver mounted seamlessly in your office.

Wi-Pour brings the profitability of a liquor gun but without compromising the guest experience. Show case the bottle as a marketing tool for your customers to see. There is no need to costly renovations to run liquor lines. Wi-Pour is a truly scalable solution for any bar.

The wireless spout is available as through our Real Time Monitoring package where we interface not only to your PC but also to your Point of Sale (POS) system. Email and text message alerts draw your attention to profit issues.

Alternatively, we create usage files on your PC for manual reconciliation to sales figures from POS.
